Santa Croce

interior contracting
history
Santa Croce, a company based in Treviso - Italy, has grown thanks to its teamwork and the experience of people that have been working at top-level since 1968 in the field of interior design, fixture production and ‘turnkey’ delivery for internal spaces such as shops, museums, concept hotels and high level residential.

Santa Croce provides a full range of store fixture services from the prototyping to the rollout of large scale fixture programs.

Our success is based on a smart connection between the technical office, the production and the warehouse that work in synergy for a timely production of quality fixture.

Santa Croce provides its customers with high quality service combining the latest industrial technology with the most painstaking handcrafted traditions, optimizing the working processes in order to develop and realize fixtures where rapidity, costs controlling and quality are cleverly matched.
